CS-1520 Lab Activity
Topic: HTML & CSS

Create a webpage like the one shown on the next page, with the following requirements:

A – The HTML file:

a) One <h1> tag with the contents "HTML & CSS Lab"
b) One <h1> tag with the contents "[Your name] Personal Page". This tag must have an "id" (to be used later as a CSS selector)
c) One <img> tag for a big image of your choice.
d) One <h2> tag for "General Info" (no class or id in this tag)
e) One <ul> tag for the three items shown in the figure below. This tag shall have a class so we can change the list items with a CSS command
f) Three <il> for the item list elements shown in the figure below (write your info in them)
g) One <h2> tag for "Hobbies" (no class or id in this tag)
h) One <ul> tag for the list of hobbies you might have. This tag shall have the same class as the one found in item (e)
i) Three <il> tag for your hobbies

B – The CSS file:

Create a CSS file that will format the following elements in the HTML file:

a) h1 selector: change the color to blue and the text-align to center
b) h1 id selector: change the color to orange and text alignment to center for the tag with the ID
c) h2 selector: change the color to green
d) class selector: change the color to brown and font-size to 20px for the tags that have the class specified

Note: don't forget to link this CSS with your html file by having the following command in the <head> of your html file:

<link rel="stylesheet" href="css_file.css">

HTML & CSS Lab

← h1

Paulo Personal Page

← h1, with an id

← img

General Info
